Frequency response from a sweep in a shoe-box shaped cartesian TLM

FFT of measurement point A

Measurement point A

FFT of measurement point B

Measurement point B

FFT of measurement point C

Measurement point C

FFT of measurement point D

Measurement point D

FFT source

source

Average normalized FFT of measurements

- TLLs per Wavelength: 5
- TLLs per Wavelength: 10
- TLLs per Wavelength: 20
- Analytical modal frequencies
